

# Cities of Tomorrow: Universal Access To Sanitation and Hygiene Services in Tanzania

Achieving universal access to adequate, sustainable and equitable sanitation and hygiene services in Babati, Tanzania.

Created by Charlie Bell-Gardiner  
Shameless Project

## The situation

More than half of Tanzania's urban population do not have access to improved toilets

## What we want to know

How to better achieve universal access to sanitation and hygiene in urban areas

## Research: Phase 1

Qualitative and quantitative data collection

## What we'll study

1. Motivations & drivers for urban households
2. Motivations & drivers for policymakers, donors & private sector
3. Main economic, social & political determinants of success
4. Risks for sanitation & hygiene behaviour change

## Research: Phase 2

Participatory planning process

Identify scenarios to be included in town-wide plan

## Outputs

Policy briefs;  
Peer-reviewed papers;  
Town-wide sanitation and hygiene plan

## Relevance

Identifying pathways to town-wide sanitation and hygiene, and conditions for scale-up
